Press Release

SUNLITE RECYCLING INDUSTRIES LAUNCHES NEW VALUE-ADDED PRODUCT AS PART OF FORWARD INTEGRATION DRIVE

{Kheda, Gujarat} – 14th April, 2025 – **Sunlite Recycling Industries Limited (INEOU2N01013)** is pleased to announce that it has commenced production of Annealed Tinned Coated Copper (ATC), marking a significant milestone in its strategic growth. This new product launch enhances the company's offerings in the renewable energy and electrical sectors, reinforcing its commitment to innovation, sustainability, and meeting the evolving needs of the industry.

Sunlite Begins Manufacturing with Focus on Forward Integration and Value-Added Products

Sunlite Recycling Industries Limited is pleased to announce the commencement of production of **Annealed Tinned Coated Copper (ATC)**, marking a significant step towards forward integration and expansion into value-added products.

The newly commissioned ATC manufacturing line is currently operating at 60% capacity, producing approximately **480 MT annually**, with an installed capacity of **800 MT per annum**. The plant is expected to achieve full operational efficiency of 800 MT over the next six months.

At optimal capacity, the ATC is projected to account for approximately ₹65.60 crore of the existing annual revenue through enhanced in-house value addition as part of the company's forward integration strategy. The EBITDA margin specific to the ATC product is expected to be around 2.20%, reflecting improved operational efficiency in this segment.

ATC is primarily used in the solar and electrical industries, offering enhanced conductivity, corrosion resistance, and long-term performance — making it a critical input in modern energy and power infrastructure.

This forward integration is a key milestone in the company's growth journey, reinforcing its commitment to innovation, value creation, and enhanced shareholder returns.

State-of-the-Art Machinery Investment

As part of the expansion for ATC production, **Sunlite Recycling Industries Limited has invested ₹2.19 crore in advanced machinery** and infrastructure, including:

- Copper Wire Bunching Machine (with tools)
- Payoff Machine
- Construction of Factory Shed

This investment reflects the company's commitment to adopting cutting-edge technology and enhancing production efficiency.

*Speaking on the launch of the new product **Mr. Nitin Heda, Managing Director of Sunlite Recycling Industries Limited**, said, "The introduction of Annealed Tinned Coated Copper (ATC) marks a major milestone in our growth journey. This product aligns with our mission to deliver high-quality, future-ready solutions for **the electrical and renewable energy sectors like Solar**. It not only broadens our product portfolio but also strengthens our position in key markets, reinforcing our dedication to innovation, efficiency, and sustainability."*

About Sunlite Recycling Industries Limited

Sunlite Recycling Industries is a leader in manufacturing high-quality copper products, including rods, wires, earthing strips, and conductors, derived from recycled copper scrap. Our products are essential for applications in power generation, transmission, distribution, and the electronic industries.
